# IDENTIFYING THE CULTURAL/ SOCIOLOGICAL ISSUES

A number of cultural and sociological issues were researched around the topic of pets and animal adoption. The below list was identified as key issues and various aspects have been integrated into the website to add to the user experience.

- **Desexing pets**

A lot of peoples pet are not desexed. This results in a large number of babies every year. Unfortunately a number of these are put down if they cannot be adopted. Desexing helps reduce this issue and is a service offered by the website. (About us, descriptions)

- **Caring for pets**

Pet rescue, rehabilitate and home matching.

- **Adopting pets**

This is the core purpose of this website. Rescued and unwanted poets are listed for adoption.

- **Animal cruelty**

Every pet that is rescued and adopted to a new home is one less living on the streets or being put down unnecessarily

**ABOUT US**

**A little bit about us**

Stefan and Luke are co-founders of FurEver Pet Adoption. Together they have years of experience rescuing animals and helping them get ready for their Furever Homes. If you are considering a pet, please adopt.

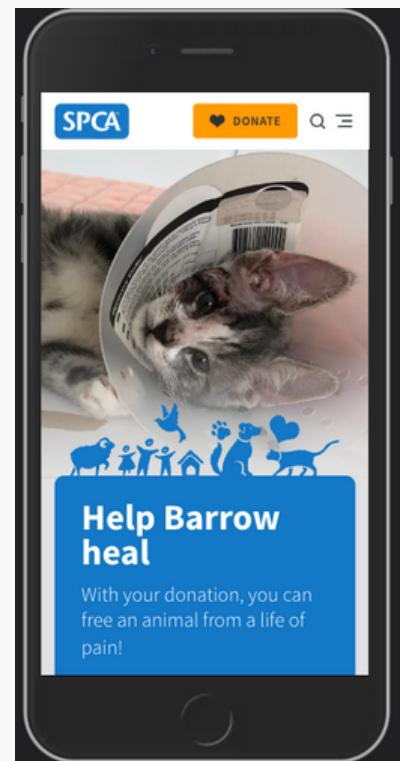

**What We Do**

We offer a variety of services to assist with the rescue and adoption of pets. From tiny birds to massive dogs, we love them all. We offer desexing and microchipping of every animal we adopt out, and match our lovely animals with loving owners. We also offer a range of educational tools to new owners who would like to adopt a new pet.

 Desex & Microchip	 Education	 Rescue
 Rehabilitate	 Home Matching	 Donation

# COMPETITOR ANALYSIS

The SPCA website features a prominent blue banner at the top with the text "Help Barrow heal" and a "DONATE NOW" button. Below the banner, there's a large image of a cat wearing a Elizabethan collar (cone). A blue graphic overlay on the left side shows silhouettes of people, animals, and houses. The header includes links for "What we do", "How you can help", "Advice & welfare", "News & events", "Services & Op Shops", "About", and "Contact". There's also a "Report animal cruelty" link and a "SPCA 150" logo.

## Pros

- Simple design
- Colour blind friendly colours
- Responsive
- Search engine is useful
- Buttons are easy to navigate
- Able to donate, request an adoption online
- Desktop speed performance was 85%

## Cons

- Not easy to navigate
- Too many texts and information
- Too many submenu
- Header can be cleaner
- Mobile speed performance was 47%

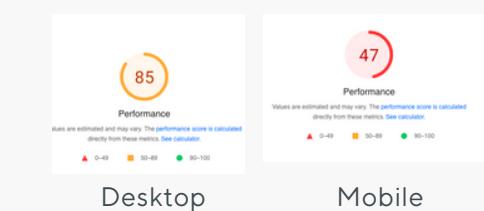

The Saving Hope Foundation website has a dark header with navigation links for "Contact Us Today! | info@savinghope.co.nz", "Make a Donation", "Adopt a Dog", "Foster a Dog", "Shop", "Contact Us", "Facebook", "My Account", and "CART". The main content features a large image of a dog being held. A blue banner at the bottom left says "2022 SAVING HOPE CALENDAR – NOW AVAILABLE!". Below the banner, the text "The Saving Hope Foundation" and "Finding Forever Homes for Dogs" is displayed. A white callout box in the bottom left corner says "Dogs needing urgent love & care" and has a "MEET OUR DOGS" button.

## Pros

- Easy to navigate
- Simple design
- Responsive
- Design is modern

## Cons

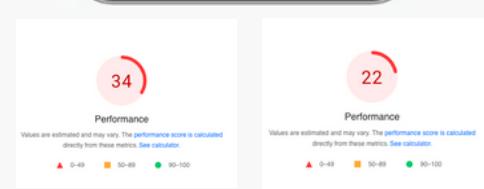

- Using many colours
- Header is a bit clumsy
- Mobile menu can be organised better
- Desktop speed performance was 34%
- Mobile speed performance was 22%

Desktop

Mobile

A mobile phone displaying the Saving Hope Foundation website. The layout is identical to the desktop version, featuring the "Contact Us Today!" header, the "2022 SAVING HOPE CALENDAR – NOW AVAILABLE!" banner, and the "The Saving Hope Foundation" text. The mobile interface includes a search bar and a menu icon in the top right corner.

Desktop

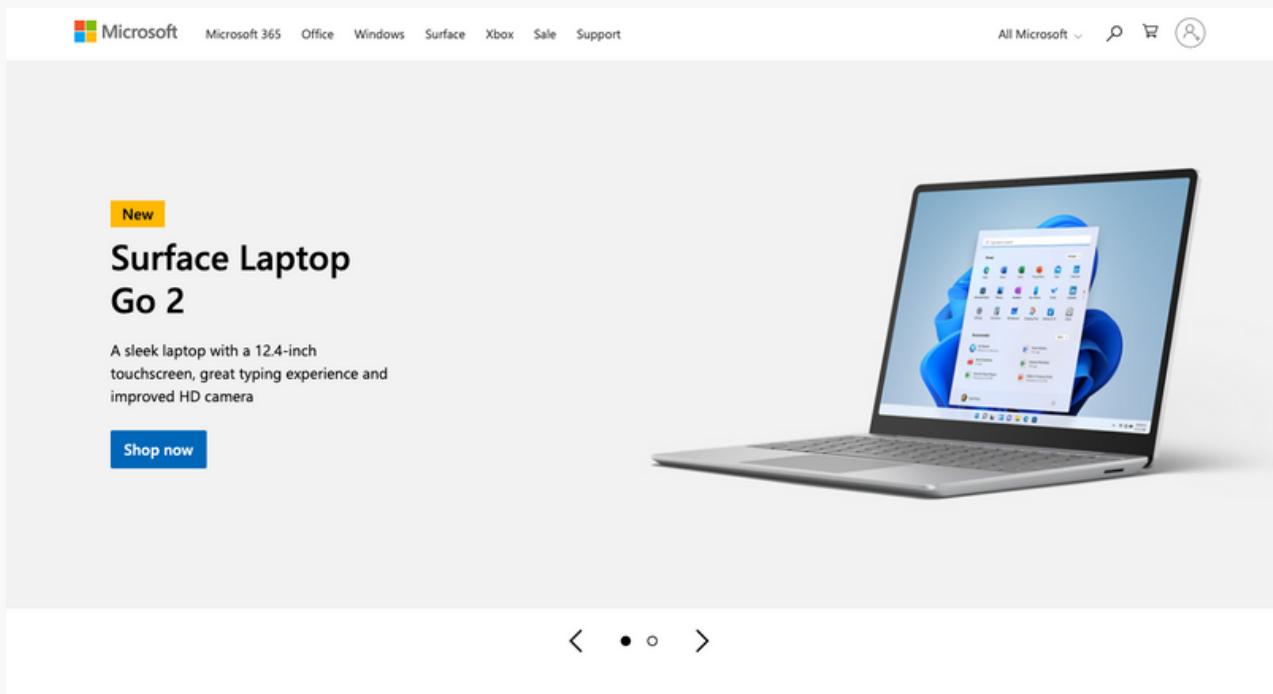

Mobile

# DESIGN IDEAS

## Apple: Minimalist Nav Menu

## Microsoft: Simple As

## Conclusion

- Simple design allows users to find information that they need
- Colour usage should be limited
- Colour blind friendly
- San-serif fonts are easy to read on the websites

# TYPOGRAPHY

## Sans-serif

One of sans-serif fonts has been selected since their typefaces are very clean and most prevalent on website including animal adoption sites.

## Font-family

**Nunito** has been chosen.

- Light 300 for body text and h4
- Bold 700 for heading

## Line-height

Line height is quite important as it has a huge impact on readability. I have decided to follow the recommendation of line height below.

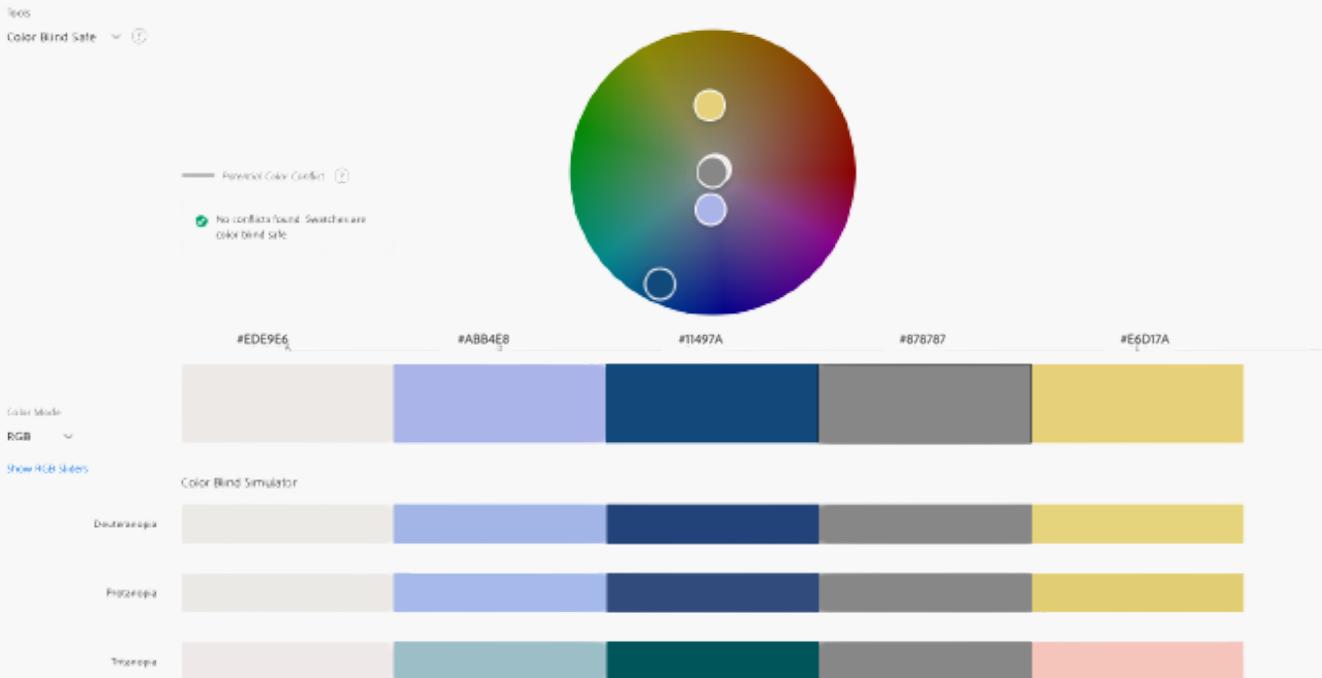

- A line height of 1.5 times the font size for body text and input field
- A line height of 1.2 times the font size for headings

## Size

Target audience is late 20s ~ 60s so that slightly larger font sizes have been selected as below.

- 35px for heading
- 18px for body text

# STYLETILE

## Colour Palette

Colour blind safe was considered, and you can see what kind of colours look like for people who have a deutanopia, protanopia and tritanopia.

Softer colours were chosen as bright colours and pure black and white might cause eye strain.

**H1 Nunito Heading**  
**H2 Nunito Heading**  
**H3 Nunito Heading**  
**H5 Nunito Heading**  
**H6 Nunito Heading**

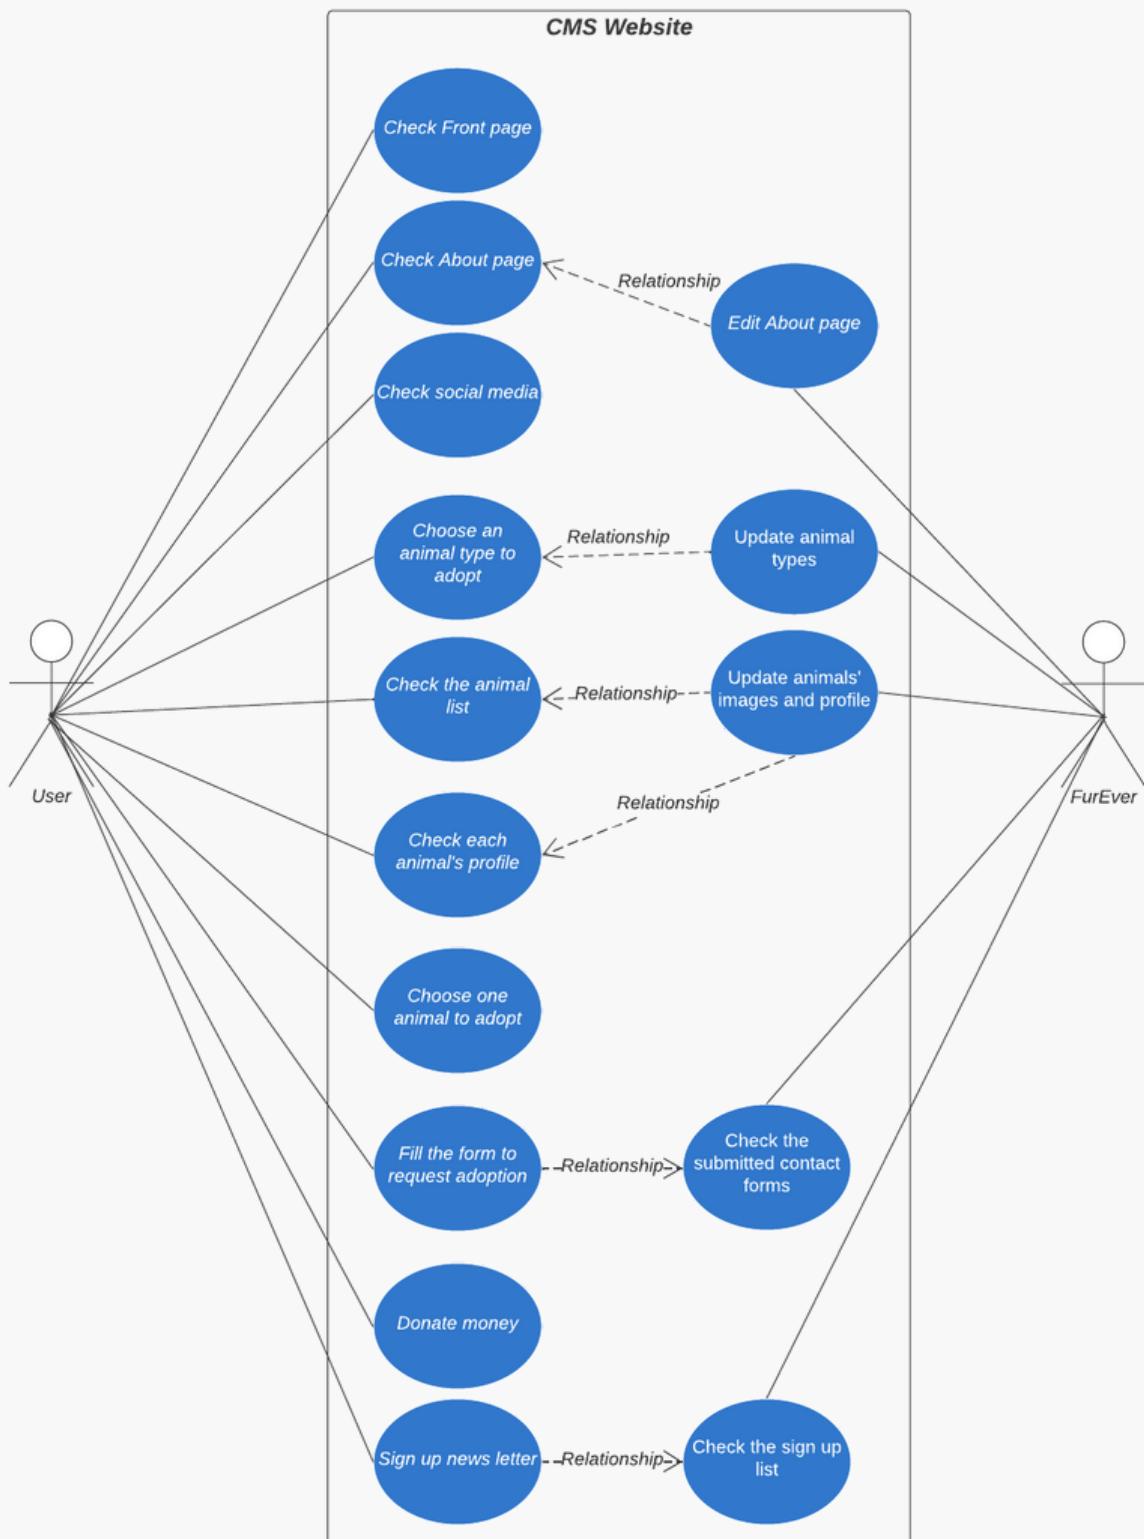

## Body Text & Input Field

*Body Text & Input Field*  
Lorem ipsum dolor sit amet, consectetur adipiscing elit. Fusce feugiat tellus sed nulla euismod placerat. Vestibulum pharetra augue eget mollis vulputate. Vestibulum sem lacus, mattis id odio ac, pretium mollis nisl. Pellentesque mi arcu, feugiat ut rutrum non, sodales et mauris. Aenean lacinia odio nunc, vitae euismod ipsum vulputate in. Suspendisse bibendum fermentum fringilla. In eu bibendum purus.

This image contains four hand-drawn wireframes for a pet adoption website, arranged in a 2x2 grid. The top row shows the 'Home' page and a 'Dog Adoption List'. The bottom row shows 'Individual Animal Info' for a dog named 'Charlie' and a 'Donation Form'. The wireframes include various UI elements like buttons, dropdowns, and input fields, all drawn with simple lines and shapes.

# Hi-Fi Wireframe

## Desktop

Hi-Fi

Hi-Fi was shown when meeting with FurEver members, Stefan and Luke. They were quite happy with the design and we decided to do the test when I built the site.

## User Testing

### Methodology

Users were provided with website home page and given a few minutes of free browsing and asked their initial impression. Next, users were asked to complete the task list and report issues with completing this task. Finally, users are asked to provide feedback on their over all experience using website and any suggestions for improvements and changes. Feedback from user testing is used to make updates to the website design.

## First Impression

### User One

User one commented that website generally looked good and colour theme was attractive. User one easily navigated adoption list and applied to adopt one cat.

### User Two

User two also easily navigated website. User two commented that website felt responsive on their mobile device(android phone). User two also highlighted some spelling mistakes.

## Task List

### TASK

- Find an adoption list
- Filter by animal
- Submit adoption request
- Register newsletter using email
- Find about us page and what FurEver does
- Find Volunteer page and apply for volunteer
- Browse online shop (Buy now buttons have been included for Woocommerce to be implemented at a future date )
- Find donate page and can donate money you want
- Search what you want to find

### User One

- ✓ Find an adoption list
- ✓ Filter by animal
- ✓ Submit adoption request
- ✓ Register newsletter using email
- ✓ Find about us page and what FurEver does
- ✓ Find Volunteer page and apply for volunteer
- ✓ Browse online shop (Buy now buttons have been included for Woocommerce to be implemented at a future date )
- ✓ Find donate page and can donate money you want
- ✓ Search what you want to find

### User Two

- ✓ Find an adoption list
- ✓ Filter by animal
- ✓ Submit adoption request
- ✓ Register newsletter using email
- ✓ Find about us page and what FurEver does
- ✓ Find Volunteer page and apply for volunteer
- ✓ Browse online shop (Buy now buttons have been included for Woocommerce to be implemented at a future date )
- ✓ Find donate page and can donate money you want
- ✓ Search what you want to find

## Feedback

### User One

- Gap at bottom under adopt button
- Newsletter pop-up on mobile cannot be closed
- Adopt page in hamburger menu to see at once.

### User Two

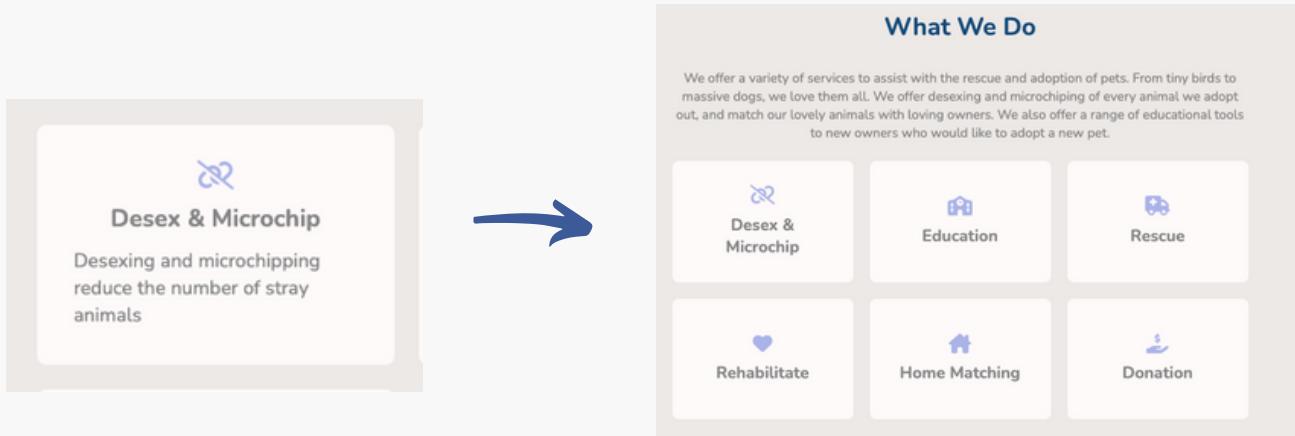

- Move text from under what we do icons to the main what we do section. This will look cleaner.

# WORDPRESS

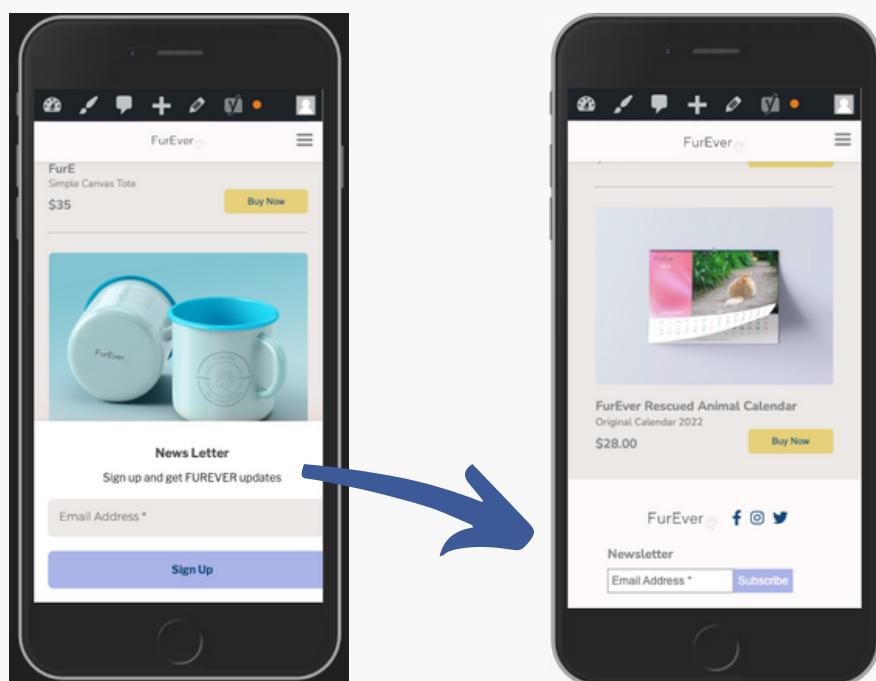

## Reflection

### Updates based on user testing

Based on the above methodology, feedback from user testing was incorporated into updates to the website. General feedback and comments were positive and both users were able to complete the full task lists without issues. A small number of spelling and grammatical errors were fixed as well as the below changes based on user feedback.

Simplified what we do icons removing texts and replaced with summary paragraph.

Mailpoet pop-up worked on desktop well, however the mobile version was a very poor design and could not be close so that it was implemented to footer instead.

# Implement Themes & Plugins

## Client Requirements

- Find an adoption list & individual animal details
- Filter by animal
- Submit adoption & volunteer requests
- Register newsletter using email
- Browse online shop (Buy now buttons have been included for Woocommerce to be implemented at a future date )
- Find donate page and can donate money users want
- Search what users want to find

## Adoption list & individual animal details

The screenshot shows a grid of adoption listings. At the top, it says "Please Take Me Home". Below are two rows of animal photos and details:  
Row 1:  
- Auckland: A dog, female / 7 years old / Chill.  
- Cha: A puppy, Female / Mix Breed / Puppy / Curious.  
- Wellington: A dog, Female / Mix Breed / 5 years old / Chill.  
- Chako: A dog, Female / Mix Breed / 5 years old / Chill.  
Row 2:  
- Auckland: A kitten, Female / Kitten / Chill.  
- Komugi: A cat, Female / Mix Breed / 6 years old / Chill.  
- Dunedin: A dog, Female / Mix Breed / 6 years old / Chill.  
- Nemu: A dog, Male / Mix Breed / 8 years old / Chill.  
- Dunedin: A dog, Male / Mix Breed / 8 years old / Chill.  
- Piyo: A dog, Male / C / Chill.

The screenshot shows the details for an individual animal named Banjo. It includes a photo of a yellow dog being petted, its name, location (Auckland), breed (Female / Mix Breed / 7 years old / Lovely), and a list of suitable family types (Children, Couple, Other Animals). It also lists health requirements and an adoption fee of \$250. A blue button labeled "Adoption Request" is at the bottom.

←Advanced Custom Fields

Custom Post Type→

The screenshot shows the "Adopt" custom post type in the WordPress admin. It includes sub-options for "Add New", "Type", "Location", "AdoptionFee", "FamilyType", and "MyHealth". A pink bracket on the right points to the "Type" option.

Taxonomy→

## Filter by animal type

The screenshot shows a filter interface for adoption. It has a title "Adoption" and a subtitle "Filter by Type of Animal". Below are three buttons: "Cat" (with a cat icon), "Dog" (with a dog icon), and "Bird" (with a bird icon).

Taxonomy→

The screenshot shows the "Type" taxonomy in the WordPress admin. It includes sub-options for "Add New", "Location", "AdoptionFee", "FamilyType", and "MyHealth". A pink circle highlights the "Type" option.

## Submit adoption & volunteer requests

The screenshot shows two forms side-by-side. On the left is the "Join Volunteer" form with fields for First Name, Last Name, Your email, Your phone, and Your message. On the right is the "Adoption Request" form with fields for First Name, Last Name, Email Address, Phone Number, Animal Name (with "Banjo" highlighted in a red circle), and Your message. Both forms have a "Join Volunteer" or "Apply to Adopt" button at the bottom.

## Plugins

The screenshot shows two contact form plugins: "Flamingo" and "Contact Form 7". Both are described as trustworthy message storage plugins. The "Flamingo" plugin is active, while "Contact Form 7" is also listed with an "Active" status. A pink circle highlights the "Animal Name" field in the adoption request form, which corresponds to the Flamingo plugin's functionality.

JavaScript was used to show an animal name on the adoption request form

# Security

The screenshot shows the plugin's page on the WordPress.org repository. It features a large icon with a shield containing a letter 'A'. The plugin name is "All In One WP Security & Firewall". Below the name is a brief description: "A comprehensive, user-friendly, all in one WordPress security and firewall plugin for your site." It indicates that the plugin is "Active" and has "More Details". A rating of 4.5 stars from 1,202 reviews is shown, along with "1+ Million Active Installations" and "Last Updated: 2 months ago". A compatibility note says it's "Compatible with your version of WordPress". On the right, there's a "Dashboard" section with a "Security Strength Meter" showing a score of 270 out of 515, with a green needle pointing towards the center.

All in One WP Security & Firewall was used to protect FurEver's website. Security strength can be find on the dashboard of the plugin.

## SEO

The screenshot shows the Yoast SEO plugin page. It features a purple icon with a white 'y' and some colored circles. The plugin name is "Yoast SEO". It is marked as "Active" and has "More Details". A brief description encourages users to "Improve your WordPress SEO: Write better content and have a fully optimised WordPress site using the Yoast SEO plugin." It is developed by "Team Yoast". To the right, a large red checkmark is followed by the text "Problems (0)". Below this, a message says "Good job! We could detect 0 problems on your site."

Yoast SEO was used for SEO and Lighthouse showed also good results for SEO on both mobile and desktop.

## Performance

The image displays four screenshots of Lighthouse performance audits. Each screenshot shows a dark-themed interface with five circular performance metrics: Performance, Accessibility, Best Practices, SEO, and PWA. The scores are as follows:

Metric	Score (Local Server)	Score (YooBe Student Network)
Performance	60	75
Accessibility	86	83
Best Practices	75	83
SEO	85	92
PWA	-	-

Below each metric is a detailed breakdown of the audit results, including specific items and their scores (e.g., 0-49, 50-89, 90-100).

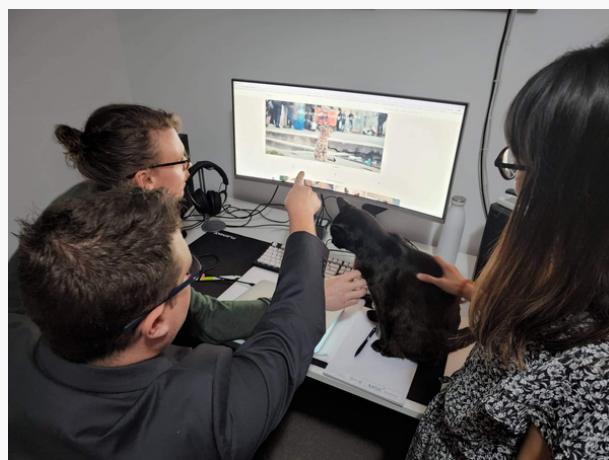

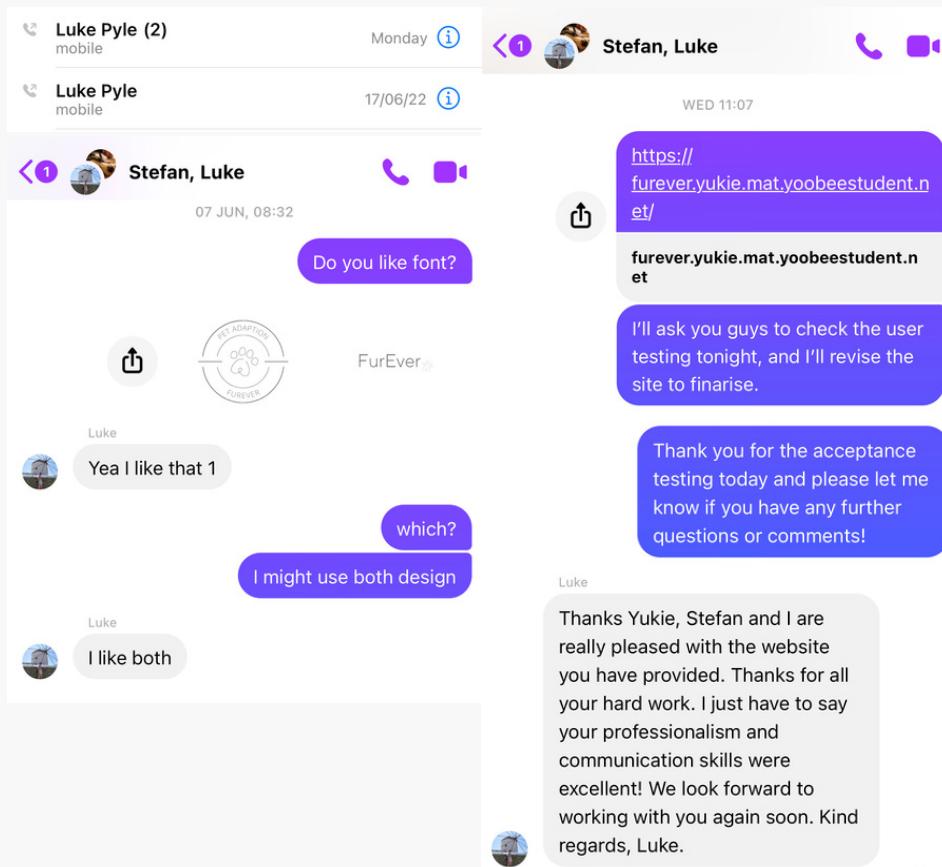

Lighthouse was used to check page quality.

The server can be changed to good one in the future as the result of local server was better as you can see above.
